

RESPONSIBILITIES

Area Safety Leaders

Area Safety Leaders are responsible for:

- Determining (through consultation with Supervisors and Work Leads having authorized operations) the Area Personal Protective Equipment (PPE) requirements for their assigned Technical Areas
- Assuring that entrances are posted with these minimum requirements
- Delineating Reduced Protection Areas and Food Areas

Supervisors and Work Leads

Supervisors and Work Leads are responsible for:

- Reviewing their operations with a Technical Area and determining process dependant PPE requirements over and above the Area PPE requirements for that Area
- Delineating Reduced Protection Areas and Food Areas
- Re-evaluation PPE requirements whenever the work or the physical layout changes
- Coordinating with the Area Safety Leader to assure that the hazards associated with their operations are reflected in the entrance placard

Workers

All Workers in technical areas, including but not limited to the Area Safety Leaders, Supervisors, and Work Leads are responsible for:

- Knowing the Personal Protective Equipment requirements for Technical Areas in which they work (including the locations and limitations of Reduced Protection Areas and Food Areas)
- Complying with the applicable PPE requirements
- Informing other in the area of these requirements
